

Centrify Application Services

Virtual Instructor-Led Training

This 3-day course is designed for administrators of Centrify Application Services. The highly engaging scenario-based simulation has over 50 hands-on practice lab tasks that will equip you to administer, configure, and manage Centrify Application Services Core Services, Applications and the MFA service. Expanded labs include SAML + Provisioning, WS-Fed + Provisioning, Centrify Workflow, Risk-Based Multi-Factor Authentication, Device Enrollment and much more.

Module 0: Introductions and Overview

As a result of this module learners will be able to:

- Describe the Course Agenda
- Navigate the lab environment
- Discuss Zero Trust Best Practices
- Describe the Centrify Identity Platform
- Describe the Centrify Application Services Solution

Module 1: Centrify Admin Portal

As a result of this module learners will be able to:

- Navigate the Admin Portal
- View Login Settings
- Create Login Suffixes
- Create Tenant URLs
- Customize the tenant colors, logo, etc.

Module 2: Centrify Connector

As a result of this module learners will be able to:

- Describe Centrify Connector Pre-requisites
- Install and Configure the Centrify Connector
- Describe the Centrify Connector Services
- Configure IWA to the Centrify Tenant
- View the Connector Utility
- View Connector Status in Admin Portal

Module 3: Roles

As a result of this module learners will be able to:

- Discuss Roles Best Practices and RBAC
- Describe functions in Roles in Centrify
- Create a Granular Admin permissions role
- Add users to a role
- Create Security Group Roles from Active Directory
- Create a Contractor Role from Centrify Directory
- Create other Roles

Module 4: Managing Users

As a result of this module learners will be able to:

- Create Additional Attributes
- Describe Centrify Directory Users
- Manually Create Users
- Perform a Bulk Import
- Manage Users from the Users page

Module 5: Policies

As a result of this module learners will be able to:

- Describe Policies Best Practice
- Navigate to the Policies Page
- View Default Policies
- Create new Policy Sets

Module 5: Policies (con't)

- Configure Policy Settings
- Perform Policy Assignment
- Create Application Policies
- Create Endpoint Policies
- Create Login Policies
- Create User Security Policies

Module 6: Applications

As a result of this module learners will be able to:

- Describe Applications Best Practices
- Configure Application Settings
- Describe and install the Centrify Browser Extension
- Add various types of Applications
- Configure an App Catalog app
- Configure an Infinite App with the Firefox Utility
- Describe the process to Import an App
- Utilize Application Templates
- Enable Self-Service Applications: Land and Catch
- View Application Status in Admin Portal
- Configure User Access
- Configure Account Mapping
- Deploy Username and Password Apps
- Deploy Shared Credentials Apps
- Deploy Recommended Apps

Module 7: SAML + Provisioning Application Configuration

As a result of this module learners will be able to:

- Describe SAML
- Describe Provisioning
- Describe Establishing Trust between IdP and SP
- Add the Zoom SAML + Provisioning Application to Centrify
- Configure the Zoom application for Centrify SAML
- Download the Security Certificate
- Configure User Access Policy
- Configure Account Mapping

Module 8: WS-Fed + Provisioning O365 Configuration

As a result of this module learners will be able to:

- Describe Federation
- Describe Pre-requisites for Office 365 Integration
- Set up an Active Directory Alternative UPN suffix
- Create a Centrify Role for Office
- Configure the O365 Application
- Federate and Sync O365 with Centrify
- Configure De-Provisioning Rules
- Provision O365 Accounts to users
- View User License count within Centrify Admin portal

Module 9: Multi-factor Authentication

As a result of this module learners will be able to:

- Describe Best Practices for MFA
- Discuss the many use cases for MFA
- Describe Factors of Authentication
- Configure Security Questions Options
- Create Authentication Profiles
- Create a Risk-Based Authentication Policy
- Create a step-up Authentication Policy
- Utilize Application Challenge Rules

Module 10: Request and Approval Workflow

As a result of this module learners will be able to:

- Enable Workflow for an Application
- Configure Manager as Approver
- Configure Specified User or Role
- Establish a No-Manager workflow
- Request an Application
- Approve an Application Request

Module 11: End-User Experience

As a result of this module learners will be able to:

- Describe the User Invitation process
- Experience User Portal Login
- Experience User Portal Navigation
- Update an Account
- Add a Security Question
- Enroll a Device
- Add a recommended Application
- Add the Centrify Browser Extension as a user
- Add a self-service Application

Module 12: Administrative Dashboards and Reports

As a result of this module learners will be able to:

- Navigate Dashboards
- Navigate the User Logins Dashboard
- Set a Default Dashboard
- Lock/Unlock an account from the Dashboard
- Manage Applications from the Apps Dashboard
- View Tenant Version and Release Notes
- Grant Support Read Only Access
- View Built-in reports
- Create a report

Module 13: Capstone Structured Experience

In this module learners will:

- Participate in a final Scenario-based simulation
- Complete a comprehensive Hands-On exercise covering all the tasks learned in class
- Troubleshoot issues as they arise

Module 14: Course Wrap-Up

In this module learners will:

- Reverse settings via Tenant Clean Up
- Engage in Final Q/A
- Complete the Customer Satisfaction Survey
- Final Sign Off

Format: Virtual Instructor-Led (VILT)

Duration: 3 days

Price: \$2250.00 per student
