

Systems Integrators & Consulting Partners Program

Accelerate and secure delivery of cloud-based applications with Centrify

The System Integrator/Consulting category is designed to support organizations that provide advisory, consultation, and delivery of services as their primary business objective. System Integrators (SI) and Consulting Partners can benefit from referral fees for opportunities as well as other incentives based on maintaining Centrify sales and technical certification competencies.

Cloud Adoption Trends and Traps

Customers of all sizes are rapidly moving to the cloud. However, challenges around provisioning users and applications combined with identity integration pose some of the biggest obstacles to the adoption of cloud applications like Office 365.

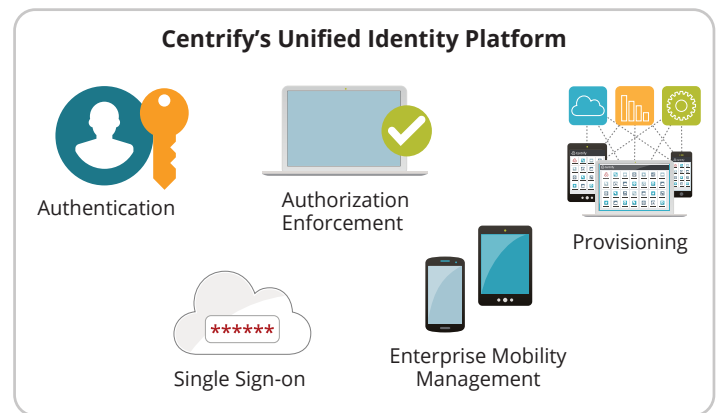

Pitfalls of Manual Processes

In particular, the labor-intensive nature of user account creation, app provisioning and enterprise identity integration makes deployment of cloud applications an overly complex and time-consuming endeavor for many customers.

Centrify Speeds App Deployment and Consumption

By partnering with Centrify, SI partners have access to Centrify Identity Service™, an easy-to-deploy, automated user & application provisioning, enterprise identity & mobility management solution.

By leveraging Centrify, partners can accelerate the secure delivery of 1000's of new cloud applications to enterprise customers, leveraging investments in existing identity infrastructure, leading to incrementally more consulting engagements, statements of work, and service dollars to your organizational practice areas.

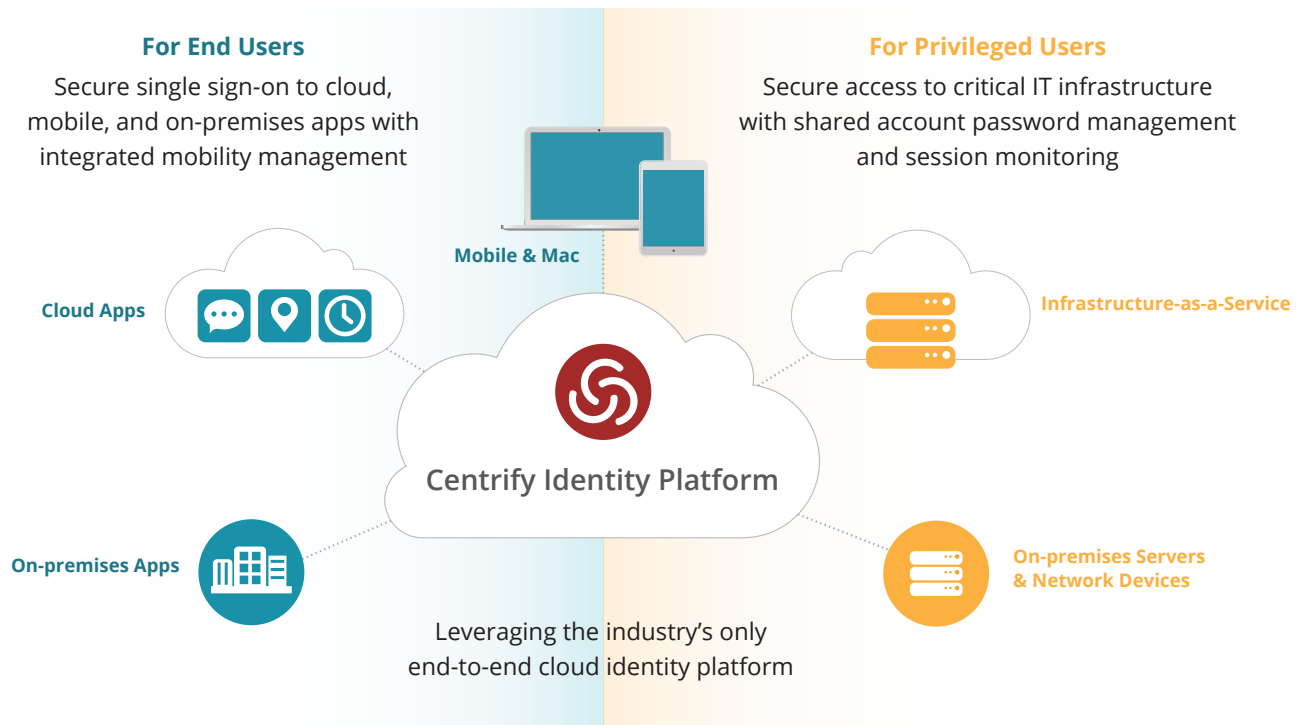

Azure-based Identity Platform

Centrify Identity Platform™ is built on Microsoft Azure, the same platform trusted by Microsoft partners for apps like Office 365, providing a reliable and credible foundation for systems integrators and consultants to confidently propose and predictably deliver integration and deployment services.

Secure Identity for End Users & Privileged Users

Centrify secures and unifies identity management across cloud, mobile and data center environments. End users gain single sign-on (SSO) to all applications and devices and privileged users gain highly secure access to IT resources both on-premises and in the cloud

Centrify solves one of the top security issues that organizations face today — data breaches from cyber threats — by leveraging an organization's existing identity infrastructure.

The Centrify Partner Program is designed to help System Integrators and Consulting Partners deliver complete unified identity management solutions that meet diverse customer needs.

To learn more about the Systems Integrators/ Consulting category of the Centrify partner program visit <https://www.centrifys.com/partners/channel-partners/>.

Centrify is the leader in securing enterprise identities against cyberthreats that target today's hybrid IT environment of cloud, mobile and on-premises. The Centrify Identity Platform protects against the leading point of attack used in data breaches — compromised credentials — by securing an enterprise's internal and external users as well as its privileged accounts. www.centrifys.com.
